this book acknowledges the significant changes in the context and contours of the traditional employee employer

relationship over the last several decades and highlights the emergence of exciting new directions for the study of psychological contracts. New technologies and emergent forms of work are extending the temporal and spatial boundaries of employment such as through the rise of the shared economy and gig workers uptake of virtual work and flexible work arrangements and the use of off site co working spaces. Technology use now permeates many aspects of jobs supported by artificial intelligence and machine learning. Technology factors that motivate work are also changing as new generations of employees embrace their callings and organizations increasingly recognize their responsibilities to society and to employee wellbeing. These changes are altering the traditional employer employee relationship and are key motivators of this volume. The chapters in this volume chart new directions for research over the next decade by widening the theoretical and methodological lenses used to explore work processes. This book will be valuable to advanced students, researchers and practitioners in organizational psychology, organization studies, workplace training and human resource management as well as those interested in improved performance of people and organizations. The chapters in this book were originally published as a special issue of the European Journal of Work and Organizational Psychology.

It is often the therapeutic relationship between client and therapist which is more important than the theoretical orientation. This book deals with the uses and abuses of the therapeutic relationship in counselling psychology, psychotherapy and related fields. It provides a framework for integration, pluralism or deepening singularity with reference to five kinds of therapeutic relationship potentially available in every kind of counselling or psychodynamic work. The original paper and framework upon which this book is based has been widely acclaimed within psychotherapeutic, humanistic and psychoanalytic circles internationally. It has been found useful by adherents of a single orientation as well as by practitioners who draw from several approaches. In addition, it has formed the basis for several courses in counselling and psychotherapy which have been recognised by national and international accrediting organisations. Dealing with an issue of increasing complexity, the book will be of great value and significance to psychotherapists, psychoanalysts, clinical and counselling psychologists and other professionals working in the field of helping human relationships such as doctors, social workers, teachers and counsellors. Informed lay people, particularly those who are involved in the helping professions, may also find it of interest and benefit.

Betty Cannon is the first to explore the implications of Sartrean philosophy for the Freudian psychoanalytic tradition. Drawing

upon sartre s work as well as her own experiences as a practicing therapist she shows that sartre was a fellow traveler who appreciated freud s psychoanalytic achievements but rebelled against the determinism of his metatheory the mind sartre argued cannot be reduced to a collection of drives and structures nor is it enslaved to its past as freud s work suggested sartre advocated an existentialist psychoanalysis based on human freedom and the self s ability to reshape its own meaning and value through the sartrean approach cannon offers a resolution to the crisis in psychoanalytic metatheory created by the current emphasis on relational needs by comparing sartre with freud and influential post freudians like melanie klein otto kernber margaret mahler d w winnicott heinz kohut harry stack sullivan and jacques lacan she demonstrates why the sartrean model transcends the limitations of traditional freudian metatheory in the process she adds a new dimension to our understanding of sartre and his place in twentieth century philosophy
